

Best Practice Workshop: OT in Atrial Tachycardias

CLINICAL CASE OBSERVATION

Tuesday, 24 May 2022 | 8.30 – 12.30 (CET)

This event will be hosted virtually

EVENT OVERVIEW

This workshop is short training focusing on the value of Omnipolar Technology (OT) in focal Atrial Tachycardias and Atrial Flutter ablation. The course is intended for physicians who are interested in expanding their knowledge on the working principles and best settings of OT. By joining, the attendees will get exposed to a live case and lectures to learn how to best use this piece of advanced mapping technology in focal Atrial Tachycardias and Atrial Flutter procedures.

OBJECTIVES

Improve efficiency and efficacy through a better understanding of Omni-polar advanced mapping technology in focal Atrial Tachycardias and Atrial Flutter

TOPICS COVERED IN PROGRAMME

- Introduction to signal processing history and OT features
- Exploring a workflow for atypical Atrial Flutters with EnSite X and OT
- Understanding the value of OT in focal Atrial Tachycardias
- Live and Live-in-a-box case observation (EnSite X™ Cardiac Mapping System, Advisor™ HDGrid Mapping Catheter Sensor Enabled™, Omnipolar Technology (OT) software)
